

CS 2433 C/C++ Programming

Programming assignment 0

5 points

Due date and time: 11:59 PM, August 23, 2016

Objective: Ensure that you can access the csx server, create a source file on csx, compile and run the program and submit the source, via handin, to the course csx account.

Problem: Design and implement a program (in a file named 'p0.c') that, when executed, prints the following information to the standard output.

[your full name]

CS 2433: C and C++ programming

[your academic standing, as freshman, sophomore, etc.]

[the date of your submission of this program to the course csx account]

The program must compile correctly and run correctly to receive full points. The source file must also contain the following information in comments at the top of the source file, and formatted as shown.

```
// [your full name]
```

```
// CS 2433: C/C++ Programming
```

```
// 2016 Fall Semester
```

```
// Assignment: program0
```

```
// Due date: August 23, 2016
```

```
// Date submitted: [the date when you actually submit the source file]
```

```
// Instructor: Richard Churchill
```

All source files submitted for this course must contain the above information, modified according to the specific assignment's name, file names, due date, etc.

In addition to the Zybooks site, the following Web sites may be of use to you as references regarding the C language and function libraries.

<http://www.cplusplus.com/reference/>

<http://www.cprogrammingexpert.com/C/Tutorial/>

You must submit your source file, named 'p0.c', to the course csx account by using the following command.

```
handin cs2433 program0 p0.c
```
